MEET THE MATERIALS

WHITE & CLEAR

Gloss Laminate
A bright white base material with a high gloss overlam finish to give the color on your bag that extra visual pop and vibrancy. This is our second most popular material.

Matte Laminate
A bright white base material with a smooth satin overlam finish. This material brings a more subtle and sophisticated look. This is our most popular material selection, with a slight soft-touch feel.

Clear Gloss (EVOH) Laminate
This clear material features a high gloss finish, excellent clarity & barrier properties, making it a great choice for freezer applications and acidic products. This is also the top material choice for windows.

Clear Matte (EVOH) Laminate
This clear material features a smooth satin finish and excellent barrier properties, making it a great choice for freezer applications and acidic products. Windows in this material will have a slight haze effect from the matte finish.

Tear Resistant Gloss Laminate
A tear resistant white gloss material features both excellent clarity and barrier properties, making it a great choice for cannabis packaging or any product needing child-resistant properties.

Tear Resistant Matte Laminate
A tear resistant white matte material features both excellent clarity and barrier properties, making it a great choice for cannabis packaging or any product needing child-resistant properties.

SPECIAL EFFECTS

Gloss Laminate w/ Metallic Effects
Gloss metallic effects create a stunning, eye-popping look & adds dimension to artwork. It allows you to highlight important elements on your bag, and achieve different metallic tones by adding a subtle, polished effect & shine!

Matte Laminate w/ Metallic Effects
With metallic effects tucked beneath a satin finish, this material delivers elegance. An eye-catching yet subtle high-end appearance.

Tear Resistant Gloss w/ Metallic Effects
This tear resistant white gloss material with metallic effects features excellent clarity and barrier properties, making it a great choice for cannabis packaging or any product needing child-resistance.

Tear Resistant Matte w/ Metallic Effects
This tear resistant white matte material with metallic effects features excellent clarity and barrier properties, making it a great choice for cannabis packaging or any product needing child-resistance.

Gloss Holographic Laminate
Our holographic film features distinctive illumination and a rainbow effect. When combined with our high-resolution digital printing process, this holographic material can create packaging with unmatched visual impact.

Matte Holographic Laminate
Our holographic film, paired with a satin finish and a slight soft-touch feel, will give your bag the perfectly paired subtle illumination and a rainbow effect.

NATURALS

Compostable Kraft Laminate
Our compostable kraft material offers an organic, brown paper appearance and sustainable benefits. This material has a 6 month shelf life and is approved by the FDA for food contact. The metalized cello provides oxygen & moisture barriers to protect your product and offers a seal strength that maintains integrity up to 140˚ F

Kraft Laminate
A brown kraft paper material with high barrier foil lining on the interior. This material produces a natural, organic look and feel.

Compostable White Laminate
Our compostable white material offers an organic, textured appearance and sustainable benefits. This material has a 6 month shelf life and is approved by the FDA for food contact. The metalized cello provides oxygen & moisture barriers to protect your product and offers a seal strength that maintains integrity up to 140˚ F

Tramado Blanco
High-quality white Maille (weave) textured finish. A luxurious look and feel, the ideal option if you're looking for a premium, prestigious packaging material.
